Dear Doru Sabau,

CAS is looking forward to working with you to give students and faculty at **Univ Stiinte Agric Med Vet Cluj-Napoca** access to the world's most complete and trusted source of chemical information. But SciFinder® isn't just for chemists! Current students and faculty from all departments can access CAS content that includes many scientific disciplines including biological sciences, biomedical sciences, engineering, materials science, agricultural science and more.

Your evaluation also includes access to PatentPak™, a new patent workflow solution available as a supplement to SciFinder. PatentPak gives your users instant access to hard-to-find-chemistry in full-text patents directly in SciFinder.

For the duration of your trial you also have access to MethodsNow™, your single source to search and compare the latest published scientific methods. A training video explaining MethodsNow features is available at:
<http://www.cas.org/products/methodsnow/training>

REGISTRATION PROCESS

Your contract term is from June 5, 2017 through July 5, 2017. As of this date, you, your students and faculty will be able to self-register for SciFinder using the self-registration URL below.

Once you register for an ID, CAS will provide administrative access to the ID. This ID can be used for searching in SciFinder and to log into **myCAS**, where you can update your personal profile, view and download reports, customize CAS Full Text Options and update your user self-registration URL. To simplify account management and reporting, you can also disable accounts / IDs that are no longer in use (e.g., those belonging to former students and faculty). This will help protect your organization against theft.

Note: CAS will not disclose personal registration information to any outside organization without your consent. Please see [CAS's Privacy Policy](#) for details.

The self-registration URL has been created for you and it is shown below:

<https://scifinder.cas.org/registration/index.html?corpKey=64E42104X86F35040X40710CC74BC7BA7E1B>

ADMINISTRATIVE AND LEARNING RESOURCES

- [SciFinder training](#) and support materials

On-demand and instructor-led training resources to help users explore SciFinder

Other CAS Solutions

CAS offers a suite of workflow solutions designed to make it easier and faster for your faculty and students to get the scientific information they need.

PatentPak™

[PatentPak](#) is a robust, patent workflow solution available in SciFinder®. Designed to radically reduce time spent acquiring and searching through multiple patents to find vital chemistry, PatentPak saves users up to half the time they spend researching patents by providing instant access to hard-to-find chemistry in patents and patent families in languages users know.

MethodsNow™

[MethodsNow](#) is a one-of-a-kind solution to search and compare the largest collection of scientific methods! It features step-by-step instructions for analytical and synthetic methods from millions of disclosed procedures. Side-by-side comparison of analytical methods makes it easy to evaluate which procedure will work best for you.

ChemZent™

Navigate chemistry's early history with [ChemZent](#), a new solution that provides access to the first and only English-searchable version of *Chemisches Zentralblatt*, the oldest journal of chemistry abstracts, covering the literature from 1830-1969.

To learn more about PatentPak, MethodsNow, ChemZent and other CAS solutions, please visit the [CAS](#) website.

QUESTIONS

Please contact the CAS Customer Center for assistance at help@cas.org, 800-753-4227 (North America) or +1 614-447-3700 (outside of North America).

Best regards,

[Shannon White](#)
